

Mission

We strive to provide the most responsive, flexible and person-centered care for people with mental illness in the community.

Belief

We believe that the provision of care and treatment in the community is the most conducive approach to holistic recovery of people with mental illness.

Goal

People with mental illness can re-integrate into community and gain acceptance and support from family and community.

Our team

We are a team of professionals providing comprehensive service to meet the needs of people with mental illness. Our team consists of psychiatrists, community psychiatric nurses, occupational therapists and social workers.

Key elements

CPS Hotline

To provide risk assessment and referral to relevant services.

Telephone Consultation

To provide mental health information, assessment and brief counseling.

Case management and outreach services

Individual service plan (ISP) will be formulated based on the needs and risk assessment of individual case within the framework of an integrated multidisciplinary model across the continuum of care in a timely manner.

Crisis intervention

To offer assertive community outreach service to patients presenting high complexity level of risk for harm reduction and to prevent the occurrence of community violence.

Family Works

To promote family mental health and harmony by encouraging clients and family members to participate in supportive counseling and training.

Mental health education

To raise public awareness of mental health in the community.

Consultation and Community Partnership

To work in close partnership with our community partners to provide coordinated services to those in need of mental health support in the community

Scope of Service

The CPS of Castle Peak Hospital provides the community psychiatric care in the NTWC where includes Tuen Mun, Yuen Long and Tin Shui Wai. Each client is assigned with a case manager who delivers a range of care and treatment according to the individual client's need. These services include medication management, psychiatric and physical health assessment, crisis intervention, daily skill training and family counseling.

Core Clientele

Clients aged between 16 - 65
For clients in need of crisis intervention, there is no age limit
