

Arrangement for Patients Attending Services of General Out-patient Clinics under Coronavirus Disease 2019 (COVID-19)

Under the situation of COVID-19, General Out-patient Clinics (GOPCs) of the Hospital Authority (HA) continue to provide service for patients.

To protect patients and staff, the HA has enhanced the infection control measures of the GOPCs. The HA advised all persons entering the clinics to bring and put on their own masks, perform hand hygiene and temperature check as instructed by clinic staff. For those persons who have fever or acute respiratory symptoms (e.g. cough, sore throat and runny nose), please proactively inform clinic staff for suitable arrangement. Meanwhile, in order to maintain social distancing for infection control, some of the clinic services are adjusted as appropriate.
