2019冠狀病毒病確診個案指定診所

Mild Symptoms: e.g. Fever, Cough, Sore Throat

The Hospital Authority's (HA) Designated Clinics (DCs) help provide treatment for the confirmed patients in the community presenting with mildly-symptomatic infections, especially high-risk patients (including the elderly aged 70 or above, children aged 5 or below, women at more than 28 weeks of pregnancy, and immunocompromised patients).

To enhance support to high-risk patients, DCs have launched the "Care Booking Line" for these patients to make appointments during booking and service hours of the designated service hours for the medical consultation.

Other confirmed patients are advised to make appointment through the "Book DC" function in its first-stop mobile app "HA Go". In addition, patients can also call the general booking telephone number of individual DC during the booking and service hours for appointment booking.

Patients who initially have follow up appointments at the Designated Clinics listed below would be arranged to nearby clinics for medication refill.
