## **HA activates service demand surge measures**

The Hospital Authority (HA) spokesperson today (May 8) announced that the HA has activated service demand surge special measures to cope with the increasing service demand due to increased activity in influenza and respiratory viruses. The HA will closely monitor various statistics and situation.

The HA spokesperson said, “Public hospitals have implemented a series of measures, including increasing manpower, opening temporary beds and mobilising hospital beds flexibly to cope with the increasing service demand for accident and emergency (A&E) departments and inpatient services. Laboratory services will be enhanced and ward rounds of senior clinicians in evenings, weekends and holidays will be increased. The HA will also facilitate patient admissions, transfers and discharges to expedite hospital bed turnover. Service capacity of general out-patient clinics (GOPCs) will be enhanced. The geriatric departments will provide assessment and discharge support to elderly people at A&E departments. The community geriatric assessment team will provide teleconsultations to elderly people who are in need and living in residential care homes.”

Latest surveillance data showed that increased activity in influenza and some respiratory pathogens has been observed. The HA will closely monitor the medical needs of the patients concerned and provide suitable treatments. The HA also appeals to members of the public who have not received seasonal influenza vaccination (SIV) to receive vaccination as soon as possible. Especially the elderly and children, who are at higher risk of getting influenza and its complications, should receive SIV early. SIV is the most effective means to prevent seasonal influenza and its complications, as well as reducing the risk of severe disease and death.

Moreover, 14 GOPCs will provide public holiday GOPC services on the Birthday of the Buddha (May 15) (see table below) to cope with the increasing service need from members of the public and to alleviate the service pressure on A&E departments during the holiday. Patients may book an appointment either through the telephone appointment system or the "Book GOPC" function of the "HA Go" mobile app.

The spokesperson said non-urgent patients should avoid attending A&E departments. They are advised to attend GOPCs, private doctors or the 24-hour clinics of private hospitals as far as practicable. To choose a suitable family doctor and related clinic service, members of the public can browse the Primary Care Directory of the Health Bureau ([www.pcdirectory.gov.hk](http://www.pcdirectory.gov.hk)).

The HA will closely monitor the situation and flexibly deploy resources and manpower when necessary, and will keep increasing its service volume, in order to provide appropriate services for patients.

**GOPC service arrangements on the Birthday of the Buddha (May 15)**
